ZALANDO (3.6B rev 2016), Software Engineer, Mar 2015–May 2017.

- Developed first high-load mobile API micro-service in Scala, 1000+ rps.
- Implemented a crawler to monitor the content and the availability of home and campaign pages.
- Set architectural patterns in the Android app to improve test coverage.
- Decreased Android app startup time by ~65% and crash rate to <0.5%.
- Interviewed countless developers (juniors to leads), doubling the Android team in less than 6 months.
- Given internal workshops on testability, unit testing and code quality.
- Mentored new developers, especially in functional languages like Scala.
- Delivered multiple projects in Scala and Java, from requirements to delivery.

CORTADO AG, Software Engineer, Jun 2013–Feb 2015.

- Prototyped and responsible for architecture of Cortado Corporate and Templace.
- Implemented key components such as preview, navigation, file operations, favorites, and others.
- Ported and adapted Personal Printing, a print job managing app.
- Collaborated with UX and product teams to assess requirements.

NATIONAL ICT AUSTRALIA, Software Engineer and Researcher intern, Aug–Dec 2012.

- Asked back to continue previous work after excellent performance.
- Expanded on the previous solution resulting in multiple scientific publications.

SIEMENS, Software Engineer intern Feb–Apr 2012.

- Reduced REAgent start-up time (~40 sec) replacing Drool Fusion with ad-hoc algorithms.
- Optimized queries in Optique which resulted in a demo for external customers.

NATIONAL ICT AUSTRALIA, Software Engineer and Researcher intern, Aug–Nov 2011.

- Developed a solution for Android security, published at the Nasa Formal Methods Symposium 2012.

Education
